As per the decision taken by the college autonomous cell for the all-round development of the students, Rs. 50,000 was sanctioned by the college for the international seminar on the proposal of the Economics Department. Also, with the registration fee of Rs. 119500 received from 217 participants from India and abroad, the International Seminar whose contemporary theme was '**Skill Development, Entrepreneurship and Environment**' was conducted smoothly.

In this program, researchers, teachers and students from almost all the major provinces of India including Uttar Pradesh, Madhya Pradesh, Maharashtra, Punjab, Bihar along with Ethiopia, South Africa, Nigeria, Russia, and America participated. Scholars, Professors and Researchers from almost all the big districts of Chhattisgarh thought deeply on the subject with full dedication.

We express our gratitude to all the learned Professors and Researchers.

International Seminar Skill Development, Entrepreneurship and Environment

12 & 13 May 2023

Introduction

The skill development of the labour force is a priority for Indian planners. Today, everyone wants to start a successful career, so workers in the unorganised sector need to receive the right skill development training. Several plans for skill development have been released by the Indian government. They must strongly emphasise skill development initiatives and support people in using their skills and knowledge. Moreover 60% of the population in India is under the age of 25, and every year, another 28 million young people join the country's labour market. This gives India a distinct demographic advantage. However, demographic divided and employability from such a big workforce must be improved as just 10% of recent grads are currently employable, according to current figures. India's GDP has been growing at a great rate of around 8.2% in the last year but job creation is not catching up with it. The skill development programmes are recently getting more importance in the government's policy in India, especially in the New Education Policy 2020. There is always a shortage of skilled workforce in every sector of the economy. The skill is directly related to the labour's marginal productivity and income level. The tribal area people still lack skills which force them to come under the undeveloped region. To bring the tribes into the mainstream of development, they must be educated, trained, and converted into skilled workers. Azadi Ka Amrit Mahotsav is an initiative of the Government of India to celebrate and commemorate 75 years of independence and the glorious history of its people, culture and achievements. This Mahotsav is dedicated to the people of India who have been instrumental in bringing India thus far in its evolutionary journey and hold within them the power and potential to enable honorable Prime Minister Narendra Modi's vision of activating India 2.0, fueled by the spirit of Aatmanirbhar Bharat. Under the Azadi ka Amrit Mahotsav is time to introspect the skill development programme and its performance in the tribal area. At present, tribal, stand after the 75 years of independence? What is the role of microfinance institutions and integrated development programmes in the life and work of tribes? What are the main pillars of the tribal economy and ways to study the changes since independence? The term "entrepreneurship environment" refers to the numerous contexts in which large, medium-sized, small sized, and other businesses must function. Therefore, the environment has an impact on the business. Entrepreneurship is generally influenced by the environment that is produced by political, social, economic, national, and other elements. Green business owners are crucial for economic growth. Green business owners can significantly help to solve the issues of unemployment, poverty, and the environment. Compared to other businesses, green entrepreneurs play a bigger part in environmentally beneficial activities and duties. Various facets of economic development are gradually becoming very significant to development. New businesses and innovative start-ups stimulate the economy. Resources are allocated to new possibilities and market gaps to create something innovative and helpful. In order to address the new challenges & the issues of today, appropriate policies must be developed. The programme focuses on how to impart entrepreneurial development to participants using fundamental and advanced methodologies. The departments responsible for skill development and representatives of the organisations imparting training under the Pradhan Mantr Kaushal Vikaas Yojana and other schemes run by the central and state governments of

Chhattisgarh, will all have a platform to present their work during this international seminar. The Seminar will cover the actual obstacles that many stakeholders encounter. Thus, the seminar will educate policymakers on building skill development programmes and implementing them for businesses and environmental concerns. The seminar will grow on the types of skills needed by entrepreneurs for a secure and safe environment, the characteristics of young people in India, as well as their potential and ambitions. The main objective of this International Seminar is to understand the concept of Entrepreneurial Development, to understand the main components of Entrepreneurship Development; to understand the relationship between skill development and entrepreneurial development and Environment; and to know the various techniques of innovation and promoting entrepreneurial culture.

Sub-theme:-

- Role of entrepreneurs in Skill development of youth
- Issues and challenges of development of entrepreneurs in India
- Minor forest product
- Need of entrepreneurs in Agricultural development
- Required skill among the tribes in the globalized world.
- Need of Competency-based Skill Education for environment development
- Indigenous health system among the tribes
- Women entrepreneurship; • Rural Entrepreneurship;
- Micro, Small and Medium Enterprises;
- Self Help Group (SHG)
- Social and political environment of India
- Green Development in India
- Environmental Law
- Cottage Industry & Environment
- Any other topic related with the theme of the conference

InaugurationSession

Date-12.05.2023,FridayTime:10:30to12:00'clock

The inauguration of the program started at the scheduled time. After Saraswati Puja and welcoming of the honorable guests, the coordinator of the program, Prof. Jayanarayan Pandey, while presenting his views on the subject with welcome address, laid emphasis on giving industry status to agriculture in India and development of cottage industries. PROF. (DR.) VIKRAM CHADHA, FORMERLY, PROF & HEAD PUNJAB SCHOOL OF ECONOMICS GND UNIVERSITY, AMRITSAR (PUNJAB) presented a keynote, brief of which is as follows-

“ In November 2022, India surpassed the British economy to ensconce itself as the 5th largest economy in the world, with \$3.17 trillion GDP. By all estimates, by 2028, India is projected to position itself as the 3rd largest, with \$5.16 trillion GDP, overtaking Japan and Germany. This has kindled our aspiration to become the largest economy with \$45-\$50 trillion GDP, by 2047 when India celebrates the centenary of Independence. At present India is the fastest growing economy in the world among the largest economies.

The major contributor to the perceptible growth of the Indian economy is its composite demographic dividend, which manifests in over 64% of the population being in the working age group of 15-64 years. But the irony is that only 4.6% of this stock has critical skills which are indispensable to provide ostensible thrust to the growth engine.

Since 2010 the focus of the policy makers has been drawn to train, skill-up and re-skill our gigantic workforce to turn it into a wealth generating asset, not only for India, but for the global economy as well. That will transform India into the economic powerhouse for the world economy by 2047.

With the launch of National Skill Development Corporation (NRDC) in 2010, and the subsequent Skill India Mission since 2015, a large number of schemes, both in the public and private sector participation mode, have been mooted. The results are encouraging as by 2022, over 12 crore workers could be skilled and trained by different agencies, including private establishments. However, the placement rate of the trained workers being low at 8%, there is a need to integrate the skilling policy with entrepreneurial development, so that the trained workers become job creators rather than job seekers. The National Policy for Skill Development and Entrepreneurship 2015 specifically aims at creating a synergy of skill formation and honing entrepreneurial capabilities to prepare innovative techno-entrepreneurs. The innovative skilled entrepreneurial resource manifests in the contemporary digital based start up economy and the innovation ecosystem that will optimise India's talent dividend.

The task is massive as every year over 10 crore new entrants are added to the job market who need to be trained freshly; while there are over 29 crore workers who need to be re-skilled. But once we are able to jack up the present proportion of 4.6% workers with critical skills, to 30% by 2030, India is well set on course to become the economic powerhouse for the global economy by 2047

Therefore, in today's situation, economic development and environment have become complementary to each other. Environment cannot be ignored in this glamor of development. We have to preserve the environment along with the search for employment opportunities. The topic of today's international seminar is very contemporary.”

Apart from this, Dr. Bhupendra Kumar from Ethiopia and Ravinder Raina from South Africa also presented their views as online guests. Tesfaye Gedyon, who came from Ethiopia, also expressed their views. The special guest of the program was Dr. S.K. Tripathi. Paying serious attention to the issue, Tripathi said that development of village industries is necessary for the development of India. Chairman of the program and Principal of the institution, Rizwan Ullah, discussed the contemporary issues and inspired the researchers from India and abroad to do excellent work. Dr. Rajkamal Mishra, Controller, Autonomous Cell expressed his thanks.

The special guest of the program, Dr. S.K. Tripathi said that “The history of India has been golden on the strength of cottage industries and India has been a golden bird.”

- Role of entrepreneurs in skill development of youth
- Issues and challenges of development of entrepreneurs in India
- Minor forest product

Chair Person

Dr. Ranjana Neelima Kachchhap Principal Govt. Naveen Girls College, Baikunthpur

Eminent Speaker Prof. Tesfaye Gedyon Asstt. Professor Gondar University, Ethiopia said-

Micro Small and Medium Enterprises (MSMEs) are one form of business that triggers the economic growth of many developing and developed countries even to survive in an economic crisis that could occur at any time. Micro small and medium enterprises produce a variety of products to serve customers with outdated or traditional product designs since owners couldn't take formal training to improve their business and even most of the owners did it because they have taken it from their families so they will do each everything by rule thumb but there is increasing demand for the products since many of them are handmade products. Advertising is considered expensive and thus, Micro small and medium enterprises can't afford it, though, the lack of promotion in the enterprise to its eventual decline and fall. As a result, adverts to the question, does advertising matter? And if yes, when, why, and how does it matter? The answers to all these questions are critically relevant because advertising in general, plays a key role both socially and economically. Most micro small and medium enterprises naively set minimum advertising budgets considering that if they only provide excellent products or services, their image will precede them but getting new customers and establishing a new brand in an already developed market is no easy endeavor and become difficult because most of these enterprises have budget limitations. The Article is organized based on secondary sources on the title by keywords of Micro small and medium enterprises advertising and small business advertising on the free and accessible papers by the free personal mobile network with Panjab university network are selected based on the direct and indirect relation to the keyword. Primary kind of research is advised to deeply understand and solve the main problem of advertising of micro small enterprises.

Dr Sushil Kumar Toppo Govt SPM College Sitapur Surguja , Mr Avinash Hota Guru Ghasidas University, Bilaspur Chhattisgarh, Dr C Toppo Govt SPM College Sitapur Surguja, Ankita Saxena Guru Ghasidas University Bilaspur Vikas Kumar Kahar Guru Ghasidas University Bilaspur, also read out his research papers.

Theysaid that:-

“Entrepreneurship is another economic component which organizes all the means of production. According to Professor Joseph Schumpeter, an entrepreneur is one who fully imagines an opportunity and creates a new product, a new production method, new raw materials, new means of production and combinations. Taking advantage of new markets and opportunities by adopting In such a situation, it is important for us to know why there is a need for women entrepreneurship. It should be known that almost half of the world's population consists of women, who are mostly uneducated, they are being exploited and exploited on a large scale. It is also necessary from the economic point of view that this large population should get development. It should be brought into the mainstream because the criterion to judge the upliftment of man is also the upliftment of women. Women entrepreneurship can be defined as a woman or group of women starting, organizing and operating a business entity. In the development of women entrepreneurship, socio-cultural factors like family background, social values, customs, lineage, traditions, religion, ideas etc. have an important place. Women entrepreneurs are considered an important means in the economic progress of any country. Women entrepreneurs not only make themselves self-reliant but also help others. Increases employment opportunities: To encourage women entrepreneurship in Indian society, there is a need to bring changes on social, family and economic fronts.”

They said that:-

Skills development is generally used to refer to the productive capabilities acquired through all levels of learning and training, occurring in formal, non-formal, informal and on-the-job settings. Environment can be defined as a sum total of all the living and non-living elements and their effects that influence human life. While all living or biotic elements are animals, plants, forests, fisheries, and birds, non-living or abiotic elements include water, land, sunlight, rocks, and air. When we asked about first economist then Adam Smith is named by all people. But even before Adam Smith, Kautilya had given the idea of economics in India. Kautilya wrote a book titled „*Arthshastram*„, in Sanskrit, expressing his economic ideas. Kautilya has used the scriptures, *Purano*, *Upanishado* as well as the writings of *Manu*, *Shukracharya*, *Yagnavalkya* etc. in his book. In the economics of Kautilya, he does not study the wealth of nations, nor does he discuss its nature and causes. But he gives such advice to the king. That the power or wealth of the State should be as well as maintain and increased. Thus, the economics given by Kautilya is not „pure and complete economics“.

At the top of the caste system are the **Brahmins**, who traditionally were the priests and scholars. They were considered to be the most spiritually pure and were responsible for performing **religious ceremonies and teaching the sacred texts**. Below the Brahmins were the **Kshatriyas**, who were the warriors and rulers. They were responsible for **protecting society and enforcing the law**. Next in the hierarchy were the **Vaishyas**, who were the **merchants and traders**. They were responsible for commerce and trade, and also for managing the economy. At the bottom of the caste system were the **Shudras**, who were the **laborers and peasants**. They were responsible for manual labor and were considered to be the lowest caste. **“INDIA WAS ALWAYS MEANT TO BE A LAND OF SKILLED WORKFORCE BUT IT WAS MADE JUST AN AGRICULTURAL LAND DUE TO THE BRITISH PLEASURE.”**

ChairPerson

Prof.Dr.NiyazAhmadAnsariGovt.College,Umaria(MP)

EminentSpeakerDr.Anita MeshramMohanLalJainGovtCollege,Khursipar,Bhilai,Durg(CG) She

Said:-

Economic environment has great importance in entrepreneurship development. The success of any business mainly depends on the economic environment. The contribution of economic environment to entrepreneurship development is as follows

1. Industrial policies in our country are announced by the government which explain the policies of the government announced for the development of industries.
2. The government has permitted foreign direct investment for all industries except a small negative list under the foreign policy. As a result industries are developing.
3. In order to strengthen the capital market for the development of industries, several fiscal incentives have been announced from time to time by the Central Government under its budget announced every year, which also helps entrepreneurs in raising capital.
4. The license system has been adopted by the government under the industrial policies for industrial development, through which the government is controlling the increase in the capacity of setting up new industries.
5. Entrepreneurs or adventurers are part of a society. The environment or environment in which the entrepreneur lives, he has to establish his business in the same and his business is affected by the environment. Along with this, the entrepreneur shall have to find opportunities for himself in this environment. Therefore, environmental information is important for the entrepreneur. Its importance can be explained in the following ways.

- In Searching for Opportunities
- in survival
- In achieving success
- Self-adjustment
- Protection of environment

If the social and economic environment is good and pleasant, then the working efficiency of the entrepreneur increases. The feeling of social togetherness develops economic and mental development. Similarly, even if the weather is favorable, the work efficiency increases. If seen, in UP, Bihar etc. summer, rain, and winter etc. every season goes to its intensity, as a result after a time it becomes difficult to work, walk on the road, go out in the open. In today's summer. Man keeps waiting for the weather to be favorable. If it rains too much, the flood turns water on the earth. Human

beings, society and nature all cooperate in development.

The sum total of the physical and cultural conditions that surround human beings and affect them is called 'Environment'. There has been an unbreakable relationship between man and nature since the beginning of time. Nature has played an important role in the development of civilization. In the initial stage of development, any living being or human first tries to adapt with the nature, after that it gradually tries to change nature. But in this course of its development, the increasing materialistic ambitions of man have brought about so much change in the environment that the balance between man and nature, which is the basis of life on earth, has reached the verge of collapse. At the same time, the short-sighted development processes of human beings have taken a destructive form. It was realized in the decade of 1970s that the present trend of development is unbalanced and the reaction of environment can convert it into destructive development.

The United Nations expressed serious concern over environmental imbalance in a May 1969 report, 'For the first time in the history of mankind, a worldwide crisis of environmental imbalance is arising. Unlimited increase in human population, capable of environmental needs and danger of increasing development of plant life – all these are its symptoms. If this current trend continues then life on earth may be in danger.'

They said that:-

Nanaji Deshmukh considers the raw materials provided by natural sources to be the most important for rural entrepreneurship. He has considered agriculture, forest, geological and animal origin as the main sources of raw materials. The process by which raw materials are converted into human useful items is called industry and the process through which raw materials are transformed and prepared for use is called technology. Nanaji Deshmukh defines rural entrepreneurship based on indigenous knowledge as an enterprise built from natural resources using industry and technology, without harming nature, and keeping in mind the needs of the next generation while fulfilling one's own needs and maintaining sustainability. Let's see. The same idea of fulfilling human needs without disrupting the supply of natural resources is prevalent in his concept of rural entrepreneurship and he has also presented successful examples of the same through various experiments. Therefore, there is a great need of today to consider the indigenous knowledge based rural entrepreneurship concept and applications.

He Said

A daily increase in the demand for organic products reflects people's psychological inclination toward wholesome foods free of pesticides, dangerous chemicals, and fertilizers. The MSME sector supports organic farming in order to meet the rising demand for food free of chemicals. The MSME sector role begins with offering appropriate training and marketing support so that farmers can easily practice organic farming under the proper direction.

Theysaid that:-

Harratikrais a small village situated on the south of blocksurajpurof chhattisgarhstate near rihand river. The population of this small village is approx 5000, many different types of people settled there. People of the village grow vegetables and do farming for their survival. People of the village are very hardworking and entrepreneur as they work on their own for money and life. The villagers farm rice two times annually. The land of the village is plateau and the villagers grow many vegetables in summer season and sell these vegetables in surajpur, bishrampur and nearby market places This way the people of Harratikra spend their life.

In the village there is many SHG groups which helps the villagers to think beyond and for entrepreneurship and helps in earning for them. Many SHG group has become helpful in small villages to grow and for the people to come front of the world There are total 15 SHG group in village which are working there fields and providing opportunities for the villagers.

There are 15 groups Lakshmi group , Annapurna group , Radha group , Saraswati group , Maa Mahamaya group , Shiv group , Santoshi group , Tara group , Sai group , Lakshami group, Jaima adishakti group, Paridhi group, Durgagroup, Hariom group, Sakshar Bharat group . These are SHG groups in harratikra village which works in different field such as Grocery distribution , poultry farm , hygiene field , compost manure production, bari development , madhyan bhojan and many more. These groups teaches many skills to people which helps them financially.

These SHG group has contributed in development of the village and helped the village financially. SHG are one of the fast growing small organizations that are changing life of thousands and

empowering women as well providing jobs for people .SHG helps people in learning new skills as poultry farming, mushroom cultivation , compost manure production and many more skills

Micro, small and medium industries have an important contribution in the Indian economy. It is the backbone of the Indian economy. It creates employment opportunities and plays an important role in the development of backward and rural areas. Today it is also moving towards realizing the dreams of 'Made for World' of self-reliant India. It contributes about 29% to the country's domestic product. There are about 6.3 crore MSMEs in India and it is a source of livelihood for about 12 crore people. After China, India has the largest MSME base in the world. The sector provides a wide range of services and is engaged in manufacturing more than 6000 products. Its share is 40% in the export market and 45% in the manufacturing sector. At present, the government has special focus on this sector to fulfill the objective of 5 trillion economy. Finance Minister Nirmala Sitharaman had announced in 2020 that the government will guarantee loans up to Rs 3 lakh crore for this sector. This is likely to benefit 45 lakh MSME industries. It has also been linked to e-market.

Therefore, if the above mentioned challenges and problems are resolved, then MSMEs will actually be able to help in creating a Rs. 5 trillion economy and a self-reliant India in the coming times. (MSME) will play an important role and the dream of 'Vocal for Local' and 'Vocal for Global' will be realized.

India is one of the fastest growing economies and now become the world's most populous nation according to United Nations population fund report. In terms of purchasing power parity India is the third largest and in account of GDP fifth largest economy in the world. Similarly, India is also lagging in many indicators in the world. There is need to focused need-based practical approachable policies to achieve sustainable development. Green economy is one of the important aspects of it. The concept of green economy has been gaining momentum all over the world. India is no exception. The central government of India has presented the budget for the year 2023-24 and green growth has been described as the first priority of this budget.

At a time when the eyes of the whole world are on India's economy, making green development a priority reflects India's commitment to development as well as sensitivity and

responsibility towards the environment. In these aspects green entrepreneurs help to provide the hotbed for starting and sustaining a green economy by providing green products and services.

A green economy is defined as low carbon, resource efficient and socially inclusive. The current paper seeks to discuss the concept of green economy, its need for green growth and sustainable development, challenges ahead and the benefits that will accrue to the world.

Keywords:greeneconomy,greengrowth, entrepreneurship.

The global economy cannot function without agriculture, which is also crucial to the economic growth and development of nations all over the world. Agriculture has a substantial economic contribution, but it still faces several difficulties, such as limited access to advanced technologies, poor infrastructure, and insufficient funding. In many nations, these difficulties have led to low productivity, decreased earnings, and food insecurity. This study examines how entrepreneurs contribute to agricultural development and emphasises the necessity of their involvement in the industry.

According to the report, entrepreneurs play an important role in agricultural growth by delivering innovative solutions to the sector's issues, creating jobs, and raising production. Their participation in agriculture, however, necessitates a favourable governmental and regulatory environment, enough financial support, and access to contemporary technologies. The study suggests that governments establish policies and tactics that stimulate agricultural entrepreneurship in order to achieve long-term economic growth and development.

In today's globalized era, Skill development is the basic necessity for self-employment and entrepreneurship. Indeed, it is the need of the hour for the economic development of 21st Century India. Today, every child must be imparted vocational education as a part of the curriculum. Education is the proper tool through which skill development is possible. It can make the all-round development of the individual. Vocational classes should be imparted as a part of the curriculum. By doing so, the cost of skill development can be reduced. Moreover, children can learn fast than the more grown up adults. When these children become adults, they can earn their own livelihood. They can learn the value of money and the taste of earning by their own sweat and brow. Besides, these children can learn some basic marketing strategies. It should be done under the supervision of a teacher. Schools should be established and the existing schools should be remodeled as sort of industrial schools. Here, industrial school refers to a school where both academic and vocation education are given. It best suits for the residential schools. However, it can be adjusted and practiced with other schools too. The present paper demonstrates the need and importance of skill development. It also focuses on the different aspects such as skills, necessity of skill development, life skills which helps to get employability. Key Words: Skills, Skill development, Importance of Life Skills, self-employment, entrepreneurship etc.

Summary

Skills, enterprise and environment complement each other. Human life is the path to highest welfare. The needs of humans are limited, those of demons are unlimited, those of gods are less and those of God are zero.

In the Ashram system of Indian culture, there is a provision of Gyan Yoga, Karma Yoga, Daan and Yagya in Brahmacharya, Grihastha, Vanaprastha and Sanyas respectively.

The value of life has been based on biodiversity. We have always given priority to business.

For the protection and all-round development of humanity, we will have to travel to the forest, society and forest and move forward in the direction of spiritual socialism by preserving the environment.

Our intention behind the seminar organized on the topic “**Skill Development, Entrepreneurship and Environment**” was to structure innovative principles through ideological thinking to restore the glory of the ancient times.

The following facts came to light in various technical sessions of the international seminar-

1. India has been ideologically strong since ancient times.
2. India has been a representative of global ideology. The aim of India was “Vasudhaiva Kutumbakam”.
3. India has always been a leader in skill development.
4. India's caste system has been based on skill.
5. The environment can be preserved only by living with nature.
6. Coordination of spirituality and society is necessary for innovation.
7. Development of entrepreneurship is possible only through innovations.
8. Conservation of biodiversity was the main focus of the Ashram system.
9. Liberalization, Privatization and Globalization (LPG) are very harmful for cottage enterprises.
10. The main reason for global decline is over-consumption and exploitation.

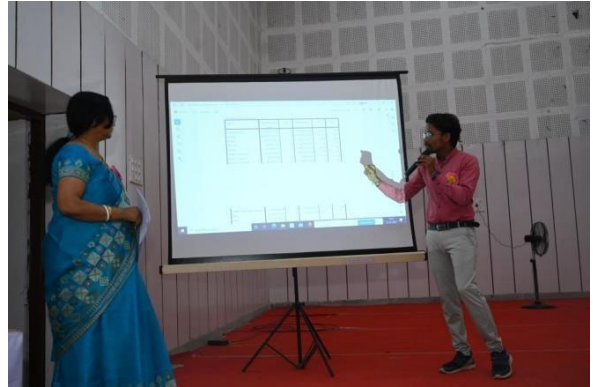

Ultimately we can say that purity of water, air and food is possible only through conservation of biodiversity. Pure thoughts arise only from pure food. Pure ideas will lead to development of innovation and entrepreneurship.

पीजी कॉलेज में दो दिनी अंतरराष्ट्रीय सेमिनार आज से

‘छत्तीसगढ़’ संवाददाता

अंबिकापुर, 11 मई। राजीव गांधी शासकीय स्नातकोत्तर महाविद्यालय अंबिकापुर में अर्थशास्त्र विभाग की तरफ से दो दिवसीय अंतरराष्ट्रीय सेमिनार का आयोजन 12-13 मई को किया जा रहा है।

इस सेमिनार में देश विदेश के ख्याति लब्ध विद्वान शामिल होंगे। कार्यक्रम के संयोजक जय नारायण पांडे ने बताया कि 12, 13 मई को आयोजित होने वाले इस सेमिनार में पर्यावरण स्किल डेवलपमेंट और एंटरप्रेन्योरशिप जैसे समसामयिक मुद्दों पर गंभीर चर्चा होने की उम्मीद है। सरगुजा की धरती पर राजीव गांधी पीजी कॉलेज द्वारा आयोजित यह दूसरा अंतरराष्ट्रीय सेमिनार है इस समय राजीव गांधी पीजी कॉलेज की सक्रियता से अंबिकापुर सरगुजा संभाग के बौद्धिक विमर्श का केंद्र बना हुआ है।

महाविद्यालय के प्राचार्य डॉ. रिजवान उल्ला ने इस अंतरराष्ट्रीय

सेमिनार के बारे में कहा कि हमारी कोशिश है कि हम वर्तमान अर्थव्यवस्था को ध्यान में रखते हुए स्वरोजगार हेतु अपने बच्चों को प्रेरित कर सकें।

मैं चाहता हूँ कि राजीव गांधी पी.जी. कॉलेज भविष्य में एक ऐसे केंद्र के रूप में उभरे जो छात्रों के सर्वांगीण विकास में महत्वपूर्ण योगदान कर सके। यह सेमिनार इसी लक्ष्य को पूरा करने के लिए आयोजित किया जा रहा है सेमिनार में देश विदेश के लगभग 200 प्रतिनिधियों के शामिल होने की उम्मीद है।

सेमिनार स्मारिका 12 मई को उद्घाटन सत्र में जारी की जाएगी। सेमिनार के ऑर्गेनाइजिंग सह सचिव डॉ. दीपक सिंह ने कहा कि सरगुजा की धरती में एक सम्मोहन है, देश दुनिया से जो भी लोग यहां आते हैं। इस धरती से प्यार कर बैठते हैं इसके साथ ही सरगुजा की बौद्धिकता अंतरराष्ट्रीय स्तर पर अपनी पहचान बना चुकी है।

नाइजीरिया से आये प्रोफेसर उस्मान उफान ने विचार रखे। इस सत्र का संचालन प्रो. कुलदीप चतुर्वेदी ने किया तथा सत्र के अंत में डॉ अनिल सिन्हा द्वारा धन्यवाद ज्ञापित किया गया। द्वितीय सत्र के पश्चात सेमिनार का समापन सत्र प्रारंभ हुआ। समापन कार्यक्रम में मुख्य अतिथि के रूप में प्रोफेसर आरएन सिंह (प्राचार्य शासकीय स्वशासी महाविद्यालय दुर्ग) उपस्थित थे। समापन कार्यक्रम की अध्यक्षता महाविद्यालय के प्राचार्य डॉ. रिजवान उल्ला ने की।

अंतरराष्ट्रीय शोध संगोष्ठी • पीजी कॉलेज में कौशल विकास उद्यमिता व पर्यावरण विषय पर आयोजन गांव के रोजगार बढ़ाने सरकार करे प्रयास: डॉ. सिंह

भास्कर न्यूज़ | अंबिकापुर

राजीव गांधी शासकीय स्नातकोत्तर महाविद्यालय अंबिकापुर में अर्थशास्त्र विभाग के तत्वावधान में कौशल विकास उद्यमिता व पर्यावरण विषय पर आयोजित अंतरराष्ट्रीय शोध संगोष्ठी शनिवार को संपन्न हुई। दो दिन तक चली संगोष्ठी में देश-विदेश से आए विद्वानों ने अपनी बात रखी। समापन समारोह में शासकीय स्वशासी महाविद्यालय दुर्ग के प्राचार्य डॉ. आरएन सिंह मुख्य अतिथि रहे। डॉ. सिंह ने रोजगार को लेकर मुख्य बातें रखी। उन्होंने कहा कि चीन आज दुनिया का आर्थिक शक्ति बना है, तो वह सिर्फ और

सिर्फ स्किल डेवलपमेंट और उद्यमिता के कारण है। उन्होंने बताया कि नई शिक्षा नीति में सभी विषयों को शामिल किया गया है, जो संगोष्ठी का विषय है। भारत के युवाओं को ऐसे वातावरण की जरूरत है, जिसमें उद्यमिता का विकास बेहतर तरीके से हो।

अध्यक्षता कर रहे पीजी कॉलेज के प्राचार्य डॉ. रिजवान उल्ला ने कहा कि भारत को युवाओं का देश कहा जाता है। ऐसे में यह बेहद जरूरी हो जाता है कि वे अपने स्किल्स का विकास करें, ताकि उसके माध्यम से वे खुद के जीवन में बदलाव लाने के साथ देश को भी आर्थिक रूप से मजबूती ला सकें।

राजीव गांधी स्नातकोत्तर कॉलेज में देश-विदेश से पहुंचे वक्ता।

पहले सत्र में वक्ताओं ने रखे विचार

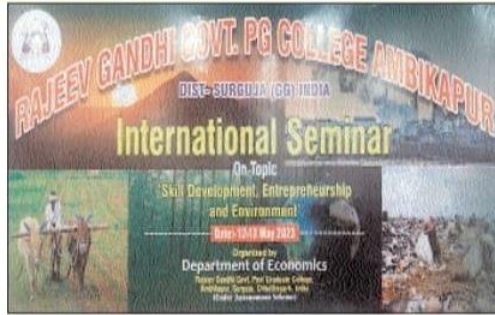

प्रथम सत्र में मध्यप्रदेश के उमरिया से आए प्रोफेसर रियाज अहमद ने अध्यक्षता की। इस सत्र में एमिनेंट स्पीकर मोहनलाल गवर्नमेंट कॉलेज से आई अनीता मेश्राम थीं। उन्होंने स्वयं सहायता समूह के विषय में कौशल विकास के बारे में बताया। कविता कृष्णमूर्ति ने अपने विचार रखे। गुरु नानक देव विश्वविद्यालय अमृतसर से आए प्रोफेसर विक्रम चड्ढा ने भी कौशल उद्यमिता पर विचार रखे। प्रथम सत्र का संचालन डॉक्टर अजय पाल सिंह ने किया। अंत में डॉ. एसएन पांडे ने धन्यवाद ज्ञापित किया।

दूसरे सत्र में शोध पत्रों का किया वाचन

द्वितीय सत्र की अध्यक्षता डॉक्टर मनीषा मेश्राम ने की। इस सत्र में नाइजीरिया से आए प्रोफेसर उस्मान उफान ने विचार रखे। दूसरे दिन दो तकनीकी सत्रों में विशेषज्ञों ने संबंधित विषय पर विचार रखे और शोधार्थियों द्वारा शोध पत्रों का वाचन किया गया। इस सत्र का संचालन प्रो. कुलदीप चतुर्वेदी ने किया। सत्र के अंत में डॉ. अनिल सिन्हा ने धन्यवाद दिया। कार्यक्रम में विशिष्ट अतिथि पूर्व प्राचार्य व अमर संचालक प्रो. एस्के त्रिपाठी, गुरु नानक देव विश्वविद्यालय अमृतसर के प्रो. विक्रम चड्ढा थे। समापन पर संचालन प्रोफेसर संजीव कुमार लकड़ा ने किया।

पीजी कॉलेज में अर्थशास्त्र विभाग द्वारा दो दिवसीय अंतरराष्ट्रीय सेमिनार का आयोजन आज से शुरू देश विदेश के ख्याति लब्ध विद्वान होंगे शामिल, पर्यावरण स्किल डेवलपमेंट जैसे मुद्दों पर होगी चर्चा

अंबिकापुर (अम्बिकावाणी समाचार)। राजीव गांधी शासकीय स्नातकोत्तर महाविद्यालय अंबिकापुर में अर्थशास्त्र विभाग की तरफ से दो दिवसीय अंतरराष्ट्रीय सेमिनार का आयोजन १२, १३ मई २०२३ को किया जा रहा है। इस सेमिनार में देश विदेश के ख्याति लब्ध विद्वान शामिल होंगे। कार्यक्रम के संयोजक जय नारायण पांडे ने बताया कि १२, १३ मई को आयोजित होने वाले इस सेमिनार में पर्यावरण स्किल डेवलपमेंट और एंटरप्रेन्योरशिप जैसे

समसामयिक मुद्दों पर गंभीर चर्चा होने की उम्मीद है। सरगुजा की धरती पर राजीव गांधी पीजी कॉलेज द्वारा आयोजित यह दूसरा

अंतरराष्ट्रीय सेमिनार है इस समय राजीव गांधी पीजी कॉलेज की सक्रियता से अंबिकापुर सरगुजा संभाग के बौद्धिक विमर्श का केंद्र

गांव के रोजगार को बढ़ाने सरकार को करना होगा प्रयास

नवभारत ब्यूरो। अम्बिकापुर।

पीजी कालेज अंबिकापुर में अर्थशास्त्र विभाग के संयोजन में कौशल विकास उद्यमिता और पर्यावरण विषय पर आयोजित अंतरराष्ट्रीय शोध संगोष्ठी का समापन दो तकनीकी सत्रों में विशेषज्ञों द्वारा संबंधित विषय पर विचार रखने और शोधार्थियों द्वारा शोध पत्रों के वाचन से हुआ। प्रथम सत्र में मध्यप्रदेश के उमरिया के प्रो. रियाज अहमद ने अध्यक्षता की। इस सत्र में एमिनेंट स्पीकर मोहनलाल गवर्नमेंट कॉलेज की अनीता मेश्राम थी। उन्होंने स्वयं सहायता समूह के विषय में कौशल विकास के बारे में बताया। इसके साथ ही साथ कविता कृष्णमूर्ति ने अपने विचार रखे। गुरु नानक देव विश्वविद्यालय

अमृतसर के प्रो. विक्रम चड्ढा ने भी विचार रखें। प्रथम सत्र का संचालन डॉ. अजय पाल सिंह तथा डॉ. एसएन पांडेय ने आभार व्यक्त किया। द्वितीय सत्र की अध्यक्षता डॉ. मनीषा मेश्राम ने की। इस सत्र में नाइजीरिया के प्रो. उस्मान उफान ने विचार रखे तथा आयुषी, नलिनी और नेहा ने शोध पत्र वाचन किया। इस सत्र का संचालन प्रो. कुलदीप चतुर्वेदी तथा डॉ. अनिल सिन्हा ने धन्यवाद ज्ञापित किया गया। सेमिनार के समापन सत्र मुख्य अतिथि प्रो. आरएन सिंह प्राचार्य शासकीय स्वशासी महाविद्यालय दुर्ग थे। प्रो. आरएन सिंह ने कहा कि नया रोजगार स्टार्टअप प्रारंभ होने के बाद वहीं उद्यमिता सफलता प्राप्त करती है जो एक हजार दिन में उत्कर्ष को प्राप्त कर लेती है। उन्होंने कहा

कि गांव के रोजगार को बढ़ाने के लिए सरकार को प्रयास करना होगा। चीन आज दुनिया का आर्थिक शक्ति बना है तो वह सिर्फ स्किल डेवलपमेंट और उद्यमिता के कारण। कार्यक्रम के अध्यक्ष पीजी कालेज प्राचार्य डॉ. रिजवान उल्ला ने कहा कि भारत को युवाओं का देश कहा जाता है, ऐसे में यह बेहद जरूरी हो जाता है कि वे अपने स्किल्स का विकास करें ताकि उसके माध्यम से वे खुद के जीवन में बदलाव लाने के साथ देश को भी आर्थिक रूप से मजबूत कर सकें। इस अवसर पर पूर्व प्राचार्य प्रो. एसके त्रिपाठी, प्रो. विक्रम चड्ढा, प्रो. नियाज अहमद, प्रो. उस्मान, डॉ. मनीषा मेश्राम, प्रो. आरिफ शेख उपस्थित थे। कार्यक्रम का संचालन प्रो. संजीव कुमार लकड़ा ने किया।
