The college provides study under four faculty Arts, Commerce, Science and Law.

"Impact of Covid-19 on Chemistry of environment and human life"

The UN's Framework for the Immediate Socio-Economic Response to the Covid-19 Crisis warns that "The Covid-19 pandemic is far more than a health crisis: it is affecting societies and economies at their core. While the impact of the pandemic will vary from country to country, it will most likely increase poverty and inequalities at a global scale, making achievement of SDGs even more urgent. The United Nations has mobilized the full capacity of the UN system through its 131 country teams serving 162 countries and territories, to support national authorities in developing public health preparedness and response plans to the Covid-19 crisis. Over the next 12 to 18 months, the socio-economic response will be one of one of three critical components of the UN's Covid-19 response, alongside the health response, led by WHO, and the Global Humanitarian Response Plan. Considering the above things, our college, is going to organize one day Webinar on the topic mentioned above with following sub headings Theme of the seminar

- Effect on Chemical Process
- Impact of Covid-19 on Environment
- Impact of Covid-19 in Agriculture Sector.
- Impact of Covid-19 in Medical Sector.
- Impact of Covid-19 on Education.
- Covid-19 and Climate Change.
- impact of Covid-19 on health

**Impact of Covid-19 on
chemistry of environment
and human life.**

Way forward for the pharma sector

- A threat to national health security due to high dependency on China led the government to set up a task force to review India's API sector. NITI Aayog and other representatives from the pharma industry suggested the following to reduce the dependency of the pharma sector on China and promote the domestic industry:
 - Promoting approvals of pharmaceutical infrastructure and development
 - Getting clearance from the environment ministry
 - Offering subsidies and tax exemptions
- Post pandemic, consumers would spend more on healthcare and personal hygiene products, which the pharma sector can capitalise on. Experts say, though the pharma sector has been impacted now, its prospects in the medium- to long-term period look good, but for that to turn into reality, the weaknesses and challenges within the industry should be addressed
