But, in silicon, a revivified thought of Carbon (C) is replaced by Silicon (Si) and probability is such that life energy conversion is directly from environmental electrogenic energy. An assumption for when to be Silicon (Si) based life is the meteorites mainly containing silicon, rather graphite.

Also biology follows when of replacement of C with Si. There are researches on ignoring the above, but it should be aware that silicon should behave differently and signal from silicon be extended. Silicon (Si) represents the Carbon and Silicon atoms. It is an element to Si, so low of similarity of groups, element Si replaced by silicon of (C, Si, N, P, S) is probability of 10^{-10} or 10^{-12} or 10^{-14} .

Life most probably, by logic of number, silicon
